WORK EXPERIENCE

Senior Software Engineer
05/2026 - Present

Ratoeira Ads
Brazil

- Migrated the Angular app from v17 to v20 and brought some consistency to the stack (standalone, OnPush, i18n, Husky) across the tracker, APIs, queues and tracking script.
- Built ad-network and checkout integrations (such as Google, Meta and TikTok) plus payment platforms (such as Stripe), including S2S webhooks, CAPI events and conversion attribution.
- Worked on the product clients actually use day to day: Hub SSO, admin, financial and sales dashboards, conversion and tracking pixels, ads manager and plan-based limits.
- Closed 200+ sprint and support tickets on timezone, currency, conversions and client-facing bugs, from the UI down to the APIs and queues.

Senior Software Engineer
01/2026 - 05/2026

Ahoy by Belago
Brazil

- Architected / lead-developed client portal from scratch (Angular 20, TypeScript, Material).
- Integrated Keycloak SSO with JWT: guards, HTTP interceptor for Bearer tokens, role-based access.
- Delivered core admin modules as standalone components: CRUD, PDF/Excel export, reusable data tables, filters and components, complex reactive forms.
- Designed architecture: standalone components, Signals, OnPush, lazy-loaded routes, environment config.
- Established standards: Docker, Nginx, Jest, ESLint/Prettier, Husky, documented guidelines.

Senior Software Engineer
03/2023 - 12/2025

Qima
China

- Key contributor to AngularJS legacy and modern Angular apps. Utilized framework expertise to build scalable solutions and deliver critical features.
- Designed and improved component architectures ensuring maintainability and technical excellence across global platforms.
- Delivered complex API integrations aligned to real business operations.
- Regularly presented new features from multiple global applications directly to executive directors, driving alignment between technical strategy and corporate goals in high-stakes environments.
- Contributed to the development of QIMA's core component library, creating and enhancing reusable Angular components adopted across multiple global projects.

Angular Developer
11/2022 - 03/2023

BairesDev
Argentina

- Enhanced UI/UX performance by 75% by optimizing components for 1 high-scale Angular project.
- Collaborated with cross-functional teams internationally to integrate REST APIs and maintain scalability.
- Enforced best practices, clean architecture, and continuous delivery pipelines to accelerate delivery speed.

Angular Developer
07/2022 - 09/2022

Ontop
Colombia

- Contributed to a major IT project built in Angular, SCSS, and TypeScript across three main environments.
- Designed clean, reusable web components and robust module structures.
- Implemented responsive layouts and backend integrations via REST endpoints.
- Conducted integrated testing, bug fixing, and daily stand-ups to enhance workflow and code performance.

Software Developer
05/2021 - 07/2022

Hausz
Brazil

- Sole front-end engineer responsible for developing from scratch a complete freight integration platform, from requirements to deployment.
- Built responsive and semantic landing pages and sites using HTML, CSS, JavaScript, and Angular.
- Integrated internal management systems with backend APIs for operational efficiency.
- Refactored legacy code, improved documentation, and conducted weekly workflow optimization sessions.

Junior Software Developer / IT
08/2018 - 05/2021

PDCA Engenharia LTDA
Brazil

- Designed and deployed websites, landing pages, and responsive layouts using HTML, CSS, and JavaScript.
- Enhanced code efficiency by 50% and improved overall repository performance.

SUMMARY

I'm a Senior Front-End Engineer with 8+ years' experience in Angular (modern versions & AngularJS) and TypeScript, building scalable, responsive applications for companies in Brazil, China, Argentina, and Colombia.

KEY ACHIEVEMENTS AND HIGHLIGHTS

Enhanced Code Efficiency
Increased application efficiency by 60% through optimized code and refactoring.

Ensured Fast Timely Delivery
Delivered 95% projects tasks and bug fixes ahead of time

Top Developer on Client - faced apps
Top developer of 6+ client web apps with over 1K monthly users.

Global Stakeholders Presentation
Showed case features to executive directors and key stakeholders, ensuring technical alignment and strategic business goals.

ESSENTIALS SKILLS
HTML, CSS, SCSS, Angular (14+), TS, JS, Redux, JEST, Agile, Pro team player, Communicative person
